Objective

I'm a curious person & motivated 4th year B.Tech Computer Science student with a solid grasp of python & java. I enjoy problem-solving & logical-thinking, & I comfortable coding at the level taught in my classes. Always eager to learn more, I'm excited to explore advanced concepts and collaborate on projects that challenge me to grow.

Technical Skills

Programming Languages: Python, Java

Web Technologies: HTML, CSS, Java Script, React JS, Node JS

Education

Qualification	Institution / Board	Year	Score
B.Tech in Computer Science & Engineering	Brainware University	Aug 2023 – Pursuing	SGPA: 8.23
12th (Higher Secondary Examination)	WBCHSE Board	2022 – 2023	63.8%
10th (Secondary Examination)	WBBSE Board	2020 – 2021	86%

Internship & Trainings

Internship:

Jun, 2025 – Sept, 2025

• AGNIRATH AEROSPACE AND DEFENCE RESEARCH PRIVATE LIMITED.

I designed the basic architecture for the flight simulator and authored the full technical documentation. I translated the core concepts into a clear implementation guide, detailing exactly how the system works and how to address potential issues. My work ensured the project's hardware logic is well-organized and easy for others to follow.

Projects

Web Development Projects:

1. Food Delivery Website (Frontend Web Project)

Technologies: HTML, CSS, JavaScript

Description:

- Developed a responsive food delivery website with interactive user interface using HTML, CSS JavaScript.
- Implemented features such as restaurant listings, menu display, and basic order flow.
- Used JavaScript for dynamic content updates and improved user interaction.
- Ensured clean UI design, responsive layout, and smooth navigation across devices.

2. Weather app (Frontend Web Application)

Technologies: HTML, CSS, React.js, Tailwind CSS

Description:

- Developed a responsive weather application using React.js and Tailwind CSS.
- Integrated real-time weather data to display temperature, humidity, and weather conditions.
- Built reusable React components and managed application state efficiently.
- Designed a modern, mobile-first UI with Tailwind CSS for fast and consistent styling.

3. Student Career Guide (Full-Stack Web Application)

Technologies: HTML, CSS, React.js, Node.js, Python (for chatbot)

Description:

- Developed a student career guidance web application to help users explore career paths and resources.
- Built an interactive and responsive frontend using React.js.
- Implemented backend services using Node.js for data handling and application logic.
- Integrated an AI-based chatbot to answer student queries and provide career-related guidance in real time.

4. Volunteer Hub (Full-Stack Web Application)

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

Description:

- Developed a full-stack volunteer management web application to connect volunteers with organizations and community events.
- Implemented secure JWT-based authentication with separate role-based dashboards for Administrators and Volunteers.
- Built features including volunteer registration, profile management, event creation, event participation, and contact message management.

- Designed a responsive and user-friendly interface using React.js and Tailwind CSS, with RESTful APIs powered by Express.js and MongoDB.

Languages

Language	Read	Write	Speak
English	✓	✓	✓
Bengali	✓	✓	✓
Hindi	✓	✗	✓

Additional Information

- **Hobbies:** Playing Cricket, Football, Badminton
- **Interest:** Travelling, Nature Photography

I hereby conclude that all the above information is correct and updated according to the interest of the candidate.
